

The VS 32-L series

The VS 32-L Automatic Strapping Head is the ideal head for applications requiring extremely high strap tension and joint efficiencies. In addition, the compact base plate permits the strapping of small packages.

Special applications for the VS 32-L are encircling strapping of coils, coil strapping through the eye, slit coils, wire and wire bundles.

Drive Mode	Electro-Pneumatic –3 motors – 2 cylinders
Strap feed speed	5.6 ft. / sec
Tensioning capacities	900 – 4500 pounds force adjustable
Air pressure	90 Psi max
Steel strapping - Widths/Thicknesses	3/4 inch , 1 inch and 1 1/4 inch, .031 inches to .040 inches – high tensile strapping up to .031 inches
Seal Type	Spot weld joint, 2 weld points, joint efficiency up to 90% of strap breaking load
Min. Surface Required	Expanding Packs 7.0 inch Slit coils 7.0 inch Round Packs Ø 31.5 inch
